JFK assassination records appeals
files not searched

Harold Weisberg 8/7/79

Attached 03-10000-4572 contains several handwritten notations that are not legible and a reference to a file from which I have not received any records. I would like a copy on which these notations can be read.

The number of the file in which there is a duplicate copy appears to have one clear number, a 7.

There is no file from which I have received any records that includes this number.

If such a duplicate filing was relevant then the file in which it was deposited also is relevant.

I therefore appeal the withholdings of relevant records in this file.
